TEMPTATION Recycling bin FFJ3

Volume	55 / 108 /55 Liter
Compartments	3
Casing material	1.4301 (AISI 304)
	stainless steel, brushed
Casing material thickness	1,5 mm
Inner liner material	galvanized steel
	Leak-proof
Width	1182 mm
Depth	532 mm
Height	897 mm
Weight	approx. 75,0 kg
Slot size	140 x 140 mm
	320 x 140 mm
	140 x 140 mm
Accessoires / Options	see FEATURES

TEMPTATION Recycling bin FFJ3

Description: Self-supporting, curved fronts and flat side panels made of stainless steel, secured with an internal construction of galvanized steel, provide great stability. The tops funnel-shaped openings guide waste into the inner liners and are also an elementary part of the fire protection (patented and certified).

Safety: The galvanized inner liners are sealed by a patented system. In the event of a fire, the rising smoke gases collect below the funnel-shaped openings. The resulting gas cushion interrupts the oxygen supply and a self-extinguishing effect occurs. In addition, the construction (inner liners / outer body) minimizes the increase in temperature at, above and below the casing in the event of fire. A snap lock protects the receptacle against unauthorized access.

Handling: Quick and easy removal of the waste bags from above. The top part of the bin automatically swivels upwards by means of a gas spring after operating the lock (1/4 turn). The contents are now visible and the waste bags can be replaced as required.
