Floor-standing bin with ashtray 65511-7

Description: Self-supporting, curved, powder-coated galvanized steel outer walls, connected to stable flat side panels. Reinforced door with welded hinges. Two door retention profiles prevent overstretching of the hinges. Doubled cover construction with welded insertion-plates that guide waste into the galvanized inner liner. The inner liner is sealed and leakproof.

Safety: A special type of surface sealing, which is hardened in the oven at 200 degrees Celsius, offers dirt hardly any surface to attack. Graffiti - even with waterproof markers - can be wiped away without the need for harsh cleaning agents. Undesirable stickers can easily be removed. Below the perforated ashtray a separate collector is installed to segregate possible fire sources.

Handling: Use the square key to operate (1/4 turn) the embedded snap lock and open the door. Pull out the inner liner. The contents are now visible and the waste bag can be replaced as required. The ash collector is now also accessible and can be removed for cleaning. The snap lock allows the door to be closed and locked without a key.
