OFFICE

Floor-standing Wastebasket Corridor

Description: Self-supporting, curved fronts and flat side panels made of stainless steel, secured with an internal construction of galvanized steel, provide great stability. The top openings guide waste into the waste bags which are attached to the included bag holders.

Safety: The container has zero fire load.

Handling: One-sided operability and convenient dropping of the waste. Quick and easy removal of the waste bag from above. The top of the bin is folded upwards manually. The contents are now visible and the waste bag can be replaced.
