OFFICE

Floor-standing wastebasket FF11

Description: Self-supporting, curved fronts and flat side panels made of stainless steel, secured with an internal construction of galvanized steel, provide great stability. The top funnel-shaped opening guides waste into the inner liner and is also an elementary part of the fire protection (patented and certified).

Safety: The galvanized inner liner is sealed by a patented system. In the event of a fire, the rising smoke gases collect below the funnel-shaped openings. The resulting gas cushion interrupts the oxygen supply and a self-extinguishing effect occurs. In addition, the construction (inner liner / outer body) minimizes the increase in temperature at, above and below the casing in the event of fire.

Handling: Quick and easy removal of the waste bag from above. The top of the bin is folded upwards by hand. The contents are now visible and the waste bag can be replaced.
