SPECIAL

Tank container Skyline Liquid

Description: Self-supporting, straight, stainless steel casing and rounded edges provide high stability for the bin. The oval aperture includes a plastic funnel which channels the liquids (up to 50 Liters) into the removable polyethylene (PE) tank. The plastic funnel includes a stainless steel strainer to prevent objects from falling into the tank container.

Safety: The stainless steel body of the bin has zero fireload. The PE-tank container is removable, leakproof and suitable for collection as well as temporary storage of liquids/ beverages. Draining is performed via a faucet which is attached to the tank container, without having to remove the tank. The bin-door is equipped with a snap-lock and not accessible for unauthorized personnel.

Handling: The door is opened with a provided key and allows a quick and simple removal of the tank container or emptying via the attached faucet. The plastic funnel can be pulled out for cleaning. Wheels are a standard part of this bin to allow easy movement of the complete bin to the next drainage point.
